PHARMA CHINA ANNUAL FORUM

April 9, 2019 To Be Announced, Shanghai, China

Confronting Healthcare Challenges in China

Pharma China Annual Forum

April 9, 2019 - Shanghai

Organizer

Beijing Jicai PharmaTech Co. Ltd. 北京集才医药技术开发有限公司

Supporting Partner

WiCON | Pharma China WiCON International Group LLC

Sponsors

RDPAC, Kantar Health, TBA

Time

9:00 AM to 5:15 PM, April 9, 2019

Venue

TBA Shanghai, China

Language

English / limited Mandarin Chinese

Fees

- RMB 6,400 / \$930 (Pharma China subscribers and RDPAC member cos)
- *RMB 6,800 / \$980* (Non-subscribers)

Fees covers attendance, refreshments, lunch, copy of presentations, **Pharma China Annual Review and Outlook 2018/2019** and latest issue of **Pharma China** journal edition

Registration/Enquiries

Space is limited to 80 participants and priorities are given to *Pharma China* subscribers.

Please contact:

Event Highlights

- * Contemporary trends & issues in Chinese Pharma in 2018 and early 2019
- * Business, healthcare reform and regulatory outlook for 2019 and beyond
- * Changing dynamics in Chinese pharma/healthcare landscape
- * Evolving new business model and pharma sales & marketing strategies
- * Trends and strategies for market access, drug R&D, partnership and licensing
- * Interactive discussion and brainstorming with our panel of top experts

Each year there are more uncertainties surrounding China healthcare and 2019 is no exception. Despite some positive developments on the front of Chinese drug registration regime, which has substantially accelerated its evaluation and approval of innovative new drugs, the pharma industry in China is faced with another overhaul of its business model, fast changing marketplace

and repeated assaults of its bottom-lines following establishment of the State Medical Insurance Administration (SMIA), introduction of national level volume-linked centralized drug purchase tender trial, and advancement of the generic quality and clinical equivalence (GQCE) program which aims to replace MNC originator drugs with local GQCE products.

While the Chinese pharma manufacturing industry saw its operating revenues up by 13.5% (above average of 9.4% for all industries) to CNY 20,181 bln in the first ten months of 2018, the industry's profits rose only 10.4% (below average of 13.6% for all industries) to CNY 255 bln in the period, according to official data.

Structural issues with the Chinese healthcare system continued to haunt the pharmaceutical

What sets this event apart from those organized by conference companies?

- It is an event organized by veteran executives for executives
- Hard-to find biz info/data presented and complimentary latest issue of Pharma China journal edition
- Only industry experts with real world experience are invited to present
- Cost effectiveness our goal for this event is not profit but to bring value-added services to our subscribers and potential customers.

industry in 2018. Notwithstanding the touted pharma industry ambitions of the Chinese government, slogans are nothing but pies in the sky when it comes to paying for better medicines. The healthcare reform has long been hijacked by cost containment and gone astray from the pledged path of improving efficiency and fixing structural flaws. The crashing course of reform is deeply rooted in the growing contradictions between wishful goals and healthcare financial reality, as well as among different government policies and their pursuits.

With tax and other revenues drying up and under threat of BMI system deficit amid a looming Chinese economic downturn, local governments are pressured by both the central government and the public to do more for healthcare with less financial resources. As local governments assaulted the pharma industry above the table with wave after wave of cost containment measures, public hospitals also squeezed drug companies under the table for funds through a variety of schemes. Shortage of low cost but clinically essential medicines has become widespread, forcing the central government to step in and often intervene administratively.

Incidentally, 2018 turned out to be a triumphant time for MNCs. A number of pharma MNCs witnessed high growth last year ahead of the flood of local GQCE products. Despite naive overjoys of some executives, such inadvertent victories are not expected to last in 2019.

The Chinese economy and the reform of its healthcare system are once again in deep water of what's become of a "lost river". Pharma companies, local or foreign, must make dynamic changes to remain competitive and survive with the turbulent market.

The *Pharma China Annual Forum 2019* is an English language annual pharma industry event oriented for foreign drug companies in China. The event's emphasis is on healthcare policies, drug regulations, market access and strategic issues as well as potential impacts of latest and upcoming policy changes on the Chinese pharma industry.

At least 10 leading experts will share their knowledge, insights and expertise. The presentation will be followed by an interactive panel discussion with speakers and other experts.

April 9, 2019 * Shanghai, China

AGENDA

8:30 - 9:00 Simple registration, networking and refreshments 9:00 - 9:05 Stanley Lau, Co-founder, IITalent and ex-China GMs of numerous MNCs Opening remarks/welcome by Chairperson James Shen, Publisher and Managing Editor, WiCONI Pharma China Contemporary Tends and Outlook of Chinese Pharmaceutical Sector 2018/2019 Wel Kang, Managing Director, RDPAC Accelerating Reimbursement of Innovative Medicines Break, refeshments and networking Steve Rosen, Simon-Kucher Considerations at each stage: Pre-launch, Launch, NRDL Listing/Post NRDL and LOE Lessons from known analogs: NRDL, announced pricing, intl/domestic impacts - Questions to ask: MNCs vs. local novel or generic cos - Approach for a multi-year plan Helen Chen, Greater China Managing Partner, Head of L.E.K. China and Asia LS and HC The Next Normal in Pharma Market Access and Commercialization - How are the volume-based procurement being implemented and monitored? - Is this pilot considered a success? - What will happen to the off-patent-originators? - What is likely to come next? - Time to reconsider business models and strategies?
